- ❖ To enable students to learn the state of art of computer science in both theoretically and practically.

OVERVIEW

Computer Literacy Programme was initiated by the Government of Tamilnadu in all Government Colleges to enrich all Undergraduate Non-Computer Science students from the year 2000-2001. This course was exclusively designed and geared with updated systems orienting towards providing the required knowledge to the students and for their upliftments in computer literacy. This course has been conducted for students from all disciplines excepting computer science.

Initially, a separate lab was established with 25 computers and other necessary equipments and a certificate course was being conducted in collaboration with NIIT, Cuddalore, under a contract period of 5 years.

In the year 2005-2006, the CLP lab with all equipments was handed over to the college by NIIT and thereafter course had been conducted successfully for all the first year undergraduate students. This one year course is being offered for Rs.1000/- with 90 practical hours and 60 theory hours. An examination is conducted by the Directorate of Collegiate Education, Chennai at the end of the course and a valid certificate is issued.

Right now, there are around 1512 students from 19 departments on roll and classes are held from 9.00 am to 5.00 pm on all college working days. The Department of Computer

Program Overview-

The broad range of essential skills encompassing programming, statistics, data analytics, data wrangling, data visualization, communication, business foundations, and ethics will enhance learners' competitiveness in the dynamic field of Data Analytics with Power BI in the industry. Equipped with a practical understanding of sought-after technical skills and the interpersonal abilities valued by employers, learners will graduate ready to apply their expertise in data analytics across various industries.

Data analysis is the process of gathering, modelling and transforming data to get useful information, suggestions and conclusions in decision-making.

- Assessment and improvement of the quality of the data.
- Compare the target population with the population being studied (sampling population).
- Forecast the possible areas where faults can occur (such as degree of non-response, number of denials, the comparison groups or the reduction or decrease in number).
- Assessment of the measures of frequency (such as mean, median, mode, etc.) and their amount.
- Assessing, i.e. how much strong relationship exists among the variables.
- Measurement of the degree of ambiguity.
- Observe and control the influences of other associated characteristics.
- Making inferences and taking decisions.
- To acquire insights regarding the relationships which are being observed or not attended.

Learning Outcome	Use Cases
Understand Data Collection, Metadata, and Data Quality	A student may analyze climate data, understand how it's collected, explore metadata like time and location, and assess data quality to draw reliable conclusions about climate change trends.
Intermediate Proficiency in Data Acquisition and Organization	A student might gather and organize financial data from various sources to analyze trends in market performance and understand factors influencing economic indicators.

Intermediate Proficiency in Data Visualization	A student might visualize patient outcomes over time, using charts and graphs to communicate trends in treatment efficacy to medical professionals.
Articulate Meaningful Lines of Inquiry	In a marketing context, a student might explore customer behavior through the collection and analysis of purchase data. This could involve investigating factors influencing buying decisions, such as demographics, product preferences, and promotional effectiveness.
Communicate Data Limitations and Analysis Results	A student studying online behavior might communicate limitations in survey data, explain the methods used to gather information, and present results regarding user preferences and engagement patterns.
Reflect on Ethics in Data Analysis	A student analyzing social media trends might reflect on the ethical considerations of extracting and using user data, considering privacy implications and potential biases in the dataset that could affect the interpretation of results.

Program Benefits:

1. **Hands-on experience:** Gain practical experience through exercises, and real-world scenarios/case studies.
2. **Industry relevance:** Stay up to date with current technologies, frameworks, and best practices.
3. **Portfolio development:** Build a strong portfolio showcasing your ideas to solve the case studies and to demonstrate your skills to potential employers.
4. **Career support:** Receive guidance on job search strategies and interview preparation to launch your software development career.

Upon successful completion of the program, learners will have a comprehensive understanding of **Data Analytics with Power BI** principles, be able to create functional dashboard, and possess the necessary skills to pursue entry-level roles or further education in the field.

Program/Training Flow

1. Training will be delivered in zoom and will be live on YouTube. Students will watch the session on YouTube Live.
2. Students will be integrated from NM portal to TechSaksham LMS.
3. Student's details will be mapped in TechSaksham LMS.
4. Faculty members to mark the attendance, LMS credentials will be shared by us.
5. Recordings and students' materials can be accessed in LMS.
